

About Kailash Kumar

Kailash Kumar is a backend developer and college student interested in Artificial Intelligence, Cloud Computing, and Data Analysis.

Technologies:

1. Java
2. Spring Boot
3. Django
4. Python

Currently Learning:

- Spring AI
- Ollama
- RAG Applications
- Embeddings
- Vector Databases
- Microsoft Azure

Projects:

1. SwapZone - Product exchange platform
2. Instagram Chatbot using Django
3. AI Product Recommendation System
4. Event Registration System

Career Goals:

- Become a cloud and AI engineer
- Work at top tech companies like Google
- Build intelligent AI applications

Technical Interests:

- Backend Development
- Machine Learning
- AI Chatbots
- Cloud Computing
- Recommendation Systems

Tools Used:

- VS Code
- Ollama
- Spring Boot
- GitHub
- PostgreSQL

Kailash enjoys learning new technologies and building real-world AI projects.
